PROFESSIONAL SYNOPSIS

Over **2+ Years** of Extensive Experience in Information Technology and Client Servicing. Having extensive experience in Workato Integration.

CAREER OBJECTIVE: Looking for a challenging role in a growing organization where I can use my skills, learn new things, and grow both personally and professionally.

- 2+ years of experience in the IT industry.
- 2 years of hands-on experience with the Workato integration platform.
- 3 months of internship experience at Oracle, gaining hands on expertise in Oracle queries.
- Experienced in end-to-end integrations with Boomi connectors like Disk, Mail, FTP, Salesforce, and Database
- I have work experience on Workato connectors like Salesforce, NetSuite, JIRA, Service Now, MySQL Database, Oracle DB, Workbot, Slack, FTP & SFTP
- Experienced in task management & API Platform In workato.
- Having good knowledge of recipe ops.
- Able to design, develop and deploy the project using Workato.
- Hands on experience on installation of local atom.
- Skilled in Workflows, Table Storage and File Storage.
- Implemented unique deployment using Workato Recipe Life Cycle Management API's.
- Skilled in requirement analysis and project documentation.
- Worked with different data formats such as XML, CSV, and JSON.
- Able to connect to any third-party application using Boomi & Workato.
- End to End Testing Life Cycle Experience (SIT, UAT).
- Ability to work individually and as a part of a team.
- Involved in end-to-end development of Integrations.
- Monitored recipe jobs and error reports as part of the production support.
- Build and export manifests as part of Workato Recipe Life Cycle Management.

ACADEMIC

- Bachelor of Engineering, QIS College of Engineering & Technology Ongole.

CERTIFICATIONS

- Workato Automation Pro I
- Workato Automation Pro II
- Workato Automation Pro III
- Workato Enterprise Integration
- Workato Technical Developer Certification
- Associate Integration Developer – Boomi

RECOGNITIONS

- PAT on the Back (2 Times)

PROJECTS WORKED

Project:1	Salesforce to NetSuite Sales Order Sync
Domine	Retail
Environment	Workato, Salesforce, NetSuite, Gmail & Outlook
Role:	Integration Developer

Description:

Developed a complete end-to-end integration using Workato to automate the synchronization of Sales Orders from Salesforce to NetSuite. The solution supported both recurring (subscription-based) and non-recurring (one-time) products. It handled real-time order creation and updates, including changes in product quantity, terminations, and product additions.
In NetSuite, the Sales Orders generated through this integration were used by the finance team to create invoices and send payment links to customers. Additionally, I performed a full historical data migration of past orders from Salesforce to NetSuite to ensure a smooth transition and maintain order history.

Responsibilities:

- Developed and deployed Workato recipes to automate Sales Order integration between Salesforce and NetSuite.
- Connected and configured application endpoints in Workato for seamless data flow.
- Created detailed field mapping documents, functional specifications, and technical documentation.
- unit testing, UAT, and end-to-end validation to ensure data accuracy and integration performance.
- Involved in deployment activities and provided Go-Live support for production readiness.
- Implemented error handling mechanisms and performed debugging/troubleshooting during failures.
- Utilized Python scripting within Workato to reduce task consumption and optimize performance.
- Handled both recurring (subscription-based) and non-recurring order types as part of the integration.
- Ensured ongoing monitoring and maintenance of integrations for stability and scalability.

Project:2	Integration Support & Migration of Cloud Applications
Domine	Operations
Environment	Workato, Various Cloud Apps
Role:	Integration Developer

Description:

Provided end-to-end support and enhancements for over 30 active integrations running in production using Workato. Handled incident resolution, monitoring, and recipe optimization to ensure smooth and uninterrupted business operations.
Currently working on building a new integration to eliminate dependency on a legacy HCM system by connecting directly with UKG Pro, improving automation efficiency and data accuracy in HR processes.

Responsibilities:

- Provided L2/L3 production support for 30 live integrations across finance, HR, and operations.
- Handled support for undocumented integrations, relying on error emails and logs to debug and resolve issues.
- Proactively analyzed failures and implemented fixes in Workato without formal process documentation.
- Migrated legacy Alteryx workflows to Workato, building 2 new integrations to replace existing data pipelines.
- Worked on a new development to integrate HR operations directly with UKG Pro, removing legacy HCM dependencies.
- Performed testing, deployment, and monitoring of integration recipes, ensuring minimal downtime

Project:3	Automated Validity Verification System for Identification IDs
Client	Retail
Environment	Workato, Custom Connector, HTTP & Mail
Role:	Sr Developer

Description:

This project aims to automate the validation of vendor identification numbers against government records within a procurement business context. It focuses on verifying the accuracy and validity of vendor-provided identification details, ensuring compliance and reliability in vendor identification processes.

Responsibilities:

- Involved in requirements gathering.
- Built the recipes effectively.
- Involved in end-to-end testing.

POC's WORKED

POC #1: Leave & Timesheet Submission via Teams
Tools: Workato, Zoho People, HTTP, Teams, Outlook, Email
Integrated Zoho People with Microsoft Teams using Workato Workbot to enable leave requests and timesheet submissions directly in Teams, improving accessibility and reducing manual effort.

POC #2: Salesforce Object Automation via Workato Genie
Tools: Workato, Slack, Salesforce, Workato File Storage
Developed an AI Agent POC using **Workato Genie** to perform **create, update, and delete** operations on Salesforce objects through **conversational interactions in Slack**. Enabled seamless IT support automation by integrating Slack, Salesforce, and Workato workflows.

POC #3: Jira Ticket Automation via Workato Genie
Tools: Workato, Slack, Jira, Workato File Storage
Created an AI Agent POC using **Workato Genie** to allow users to **create Jira tickets** through **conversational interactions in Slack**. Integrated Slack, Jira, and Workato workflows to automate and streamline IT support processes.
