PAVANKUMAR KARRE

+91-9390365070 | Hyderabad |

Pavankumarkarre143@gmail.com | GITHUB | LINKEDIN

Professional Summary

Certified Ethical Hacker (CEH) with strong hands-on experience in Security Operations Center (SOC) environments, specializing in real-time security monitoring, alert triage, and incident response. Skilled in analyzing logs, identifying Indicators of Compromise (IOCs), and correlating events using SIEM tools to detect and respond to threats. Proficient in investigating phishing, brute-force, and malware-related incidents through practical lab simulations. Strong understanding of network protocols and security operations, with a proactive approach to threat detection and escalation.

Technical Skills

SOC Operations :24/7 Security Monitoring & Alert Triage, Incident Investigation & Initial Response, False positive Validation, SOP-Based incident handling, Incident Escalation &Case Documentation.

SIEM & Security Tools :Splunk Enterprise(searches, dashboards, alerts), Event Correlation & Detection logic, Windows Security & Authentication logs, Basic Linux logs, IDS/IPS & Firewall Concepts (Basic).

Threat & Detection logic : Brute-force attack detection, Phishing Investigation(basic), Malware Indicator Analysis using Virus total, abuse IPDB, IOC Reputation checks (hash, IP,domain)using Virus Total, MITRE ATT&CK Technique Mapping.

Networking & Protocols :TCP/IP, DNS, HTTP/HTTPS, Firewall Basics, Wireshark, Virtual Machine.

Vulnerability & Security Concepts: Vulnerability identification(basic), Windows & Linux Security Logs

Other : Security Documentation & Reporting, Email Writing, Shift Handover Communication

Projects

1. **SQL Injection Authentication Bypass Method**
   - Performed hands-on testing of login systems to identify SQL Injection vulnerabilities that could lead to authentication bypass.
   - Demonstrated how improper input validation allows attackers to gain unauthorized access and suggested secure coding practices to prevent such attacks.

2. **Exploring IoT Devices Vulnerabilities through Malware Analysis and Reverse Engineering**
   - Investigated IoT security threats by analyzing malware samples and reverse engineering techniques. Assessed vulnerability patterns in firmware, identified communication weaknesses, and documented insights to improve IoT device security.

3. **Object Detection using YOLOv8**
   - Built a real-time object detection model using YOLOv8, trained with Roboflow datasets. Applied it to image and video data to detect and classify objects. Evaluated detection performance

Certifications

CEH (Certified Ethical Hacker)EC Council - **ECC6724098513**

Cyber Threat Intelligence 101

Certified Ethical Hacker NPTEL - 2024

Education

B.Tech – CSE (Cyber Security) **2021 – 2025**
Godavari Institute of Engineering and Technology
CGPA: 7.54

Intermediate (MPC) **2018 - 2020**
SRKR Junior College
CGPA: 7.53

SSC **2017 – 2018**
Kamala High School
CGPA: 9.20

Declaration

I hereby declare that the above information is true and correct to the best of my knowledge. I understand the importance of data security, confidentiality, and ethical conduct, and I commit to adhering to all cybersecurity policies and standards.

Regards,
Pavankumar karre
